New 1/2" High Visibility Steel Core Chimney Strop from CSS Worksafe.

Allows hands free access to and around chimney whilst maintaining three points of contact.

The high visibility Steel Core Chimney Strop from CSS Worksafe is quick and simple to use. Ideal for inspection and maintenance of chimney, flue installation, cleaning, small pointing jobs, aerial and satellite dish installation and alignment.

Constructed from user friendly 1/2" diameter, 12 strand polyester and polypropylene braided cover manufactured directly over a 1/4" diameter galvanised steel aircraft cable core. Aluminium compression fittings securely capture both steel cable core and the braided rope jacket.

Supplied in a length of 8Mtrs / 26'6", the Steel Cored Chimney Strop is long enough to reach around all but the largest of stacks. The length of the strop is easily adjusted by the zinc plated steel rope grab.
